

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Original) A measuring and dispensing device for attachment to the cap on a bottle of liquid medicine, the device comprising on one of its sides a socket formation by means of which it may be releasably attached to the cap, and on another side a concave formation for receiving liquid medicine, wherein the socket formation is a close but non-gripping fit on the cap.
2. (Original) A device as claimed in claim 1, wherein the socket formation and the concave formation face in opposite directions.
3. (Previously Presented) A device as claimed in claim 1, wherein the device is stable when the socket formation rests on a horizontal surface.
4. (Previously Presented) A device as claimed in claim 1, wherein the concave formation is graduated on its internal surface.

5. (Previously Presented) A device as claimed in claim 1, wherein the internal surface of the concave formation has a surface finish which does not act to retain liquid medicine.

6. (Previously Presented) A bottle of liquid medicine, having a cap onto which is fitted the socket formation of a measuring and dispensing device as claimed in claim 1.

7. (Original) A method of dispensing liquid medicine from a bottle as claimed in claim 6, the method including:

removing the measuring and dispensing device from the cap of the bottle;

removing the cap of the bottle; and

delivering the liquid medicine from the bottle into concave formation of the measuring and dispensing device to the required amount.

8. (Canceled)

9. (New) A device as claimed in claim 1, wherein the axial center of the socket formation contains a projection which, when the device is in use, makes contact with the cap.
